DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 9/6/06 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Crone (U.S. 4,217,757). Crone discloses an exhaust emission control device (Fig. 1, No. 11) with a particulate filter (Fig. 2, No. 19) stored in a muffler (Fig. 2, Nos. 24 and 26) which in turn is incorporated in an exhaust pipe (Fig. 1, No. 18), comprising a recess (Modified Fig. 2, Recess) at a temperature detecting area on a casing of the muffler, the recess being concave up to a position in proximity to the particulate filter in the casing (Modified Fig. 2, Recess), and a temperature sensor (Fig. 2, No. 36) arranged to penetrate a deepest portion of the recess.

FIG. 2**Modified Fig. 2**

5. With regards to claim 2, Crone discloses the exhaust emissions control device of claim 1, as described above, and further wherein the recess is in the form of a cup (Modified Fig. 2, Recess) and an operation space (Modified Fig. 2, Operation Space) is secured around the temperature sensor penetrating the recess to allow for operation of a tool for attachment/detachment of the temperature sensor.
